

Nemesis is a NExt-generation Multi-channel E-commerce SYStem that helps your business to increase visibility, performance and customer engagement through our state-of-art e-commerce software.

THE PROBLEMS WE SOLVE

READY TO LAUNCH YOUR E-COMMERCE BUSINESS?

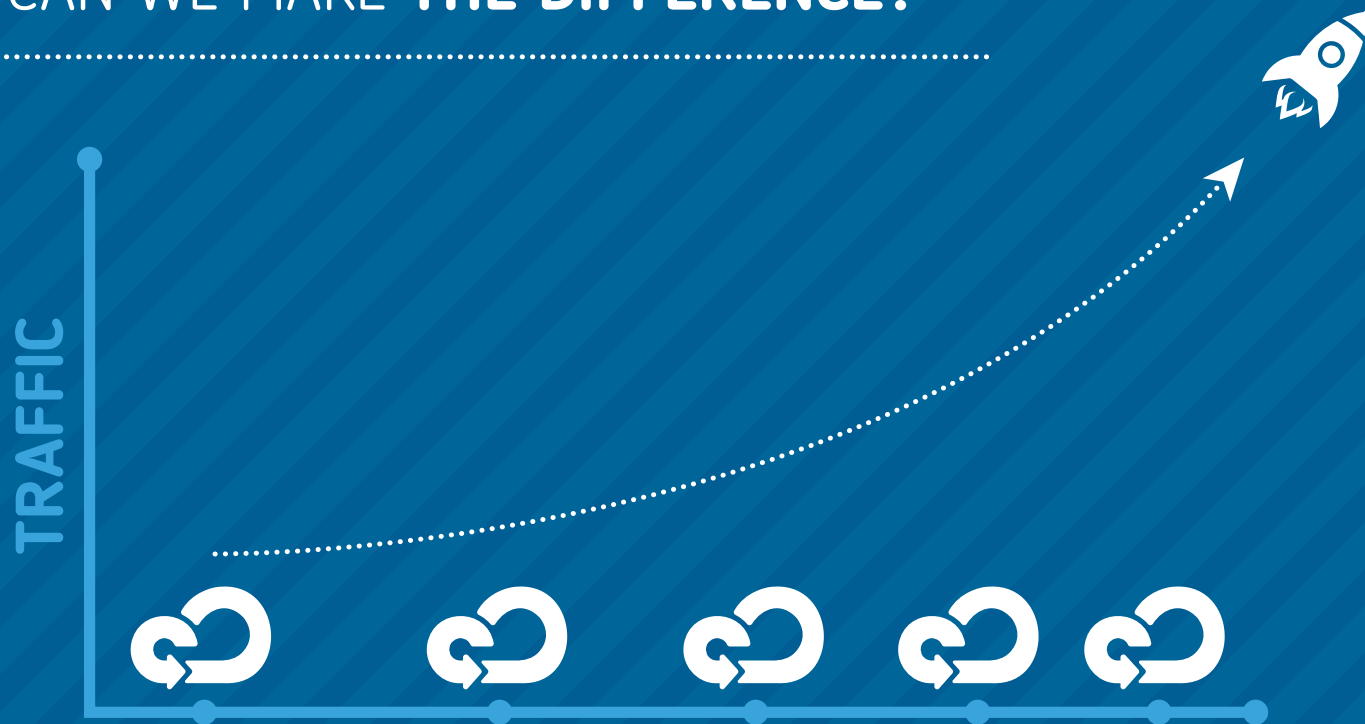

What will you go for - cheap (or even free) open-source solution with limited amount of features, or a million-dollar-license enterprise solution, all bundled with hundreds of features that you don't intend to use at all? Either one you choose will fail to perform under certain circumstances (amount of traffic, amount of products, etc).

YOU ALREADY HAVE AN E-COMMERCE PLATFORM BUT ARE YOU PREPARED TO SCALE?

Holidays and black Fridays can drive a lot of traffic to your e-commerce, website even though you don't expect it. Simply because people will visit your website to compare the prices with your competitors. Are you sure you have the right infrastructure to handle that traffic? What if your website goes down, your customers are frustrated and you lose revenue?

HOW CAN WE MAKE THE DIFFERENCE?

CLOUD NATIVE SOLUTION.

Nemesis is the first truly cloud-native e-commerce platform on the market. We deploy our platform on infrastructure-as-a-service (IaaS) so you only pay for the infrastructure that you actively use. If Christmas comes the cloud platform (PaaS) will detect the increase of traffic and will automatically allocate more nodes to your setup, scaling horizontally, insuring your website never goes down and leaving your customers happy. When Christmas is over and your traffic decreases the cloud platform will automatically deallocate the nodes that you don't use, so that you don't pay for them.

FINE-GRAINED MODULARITY

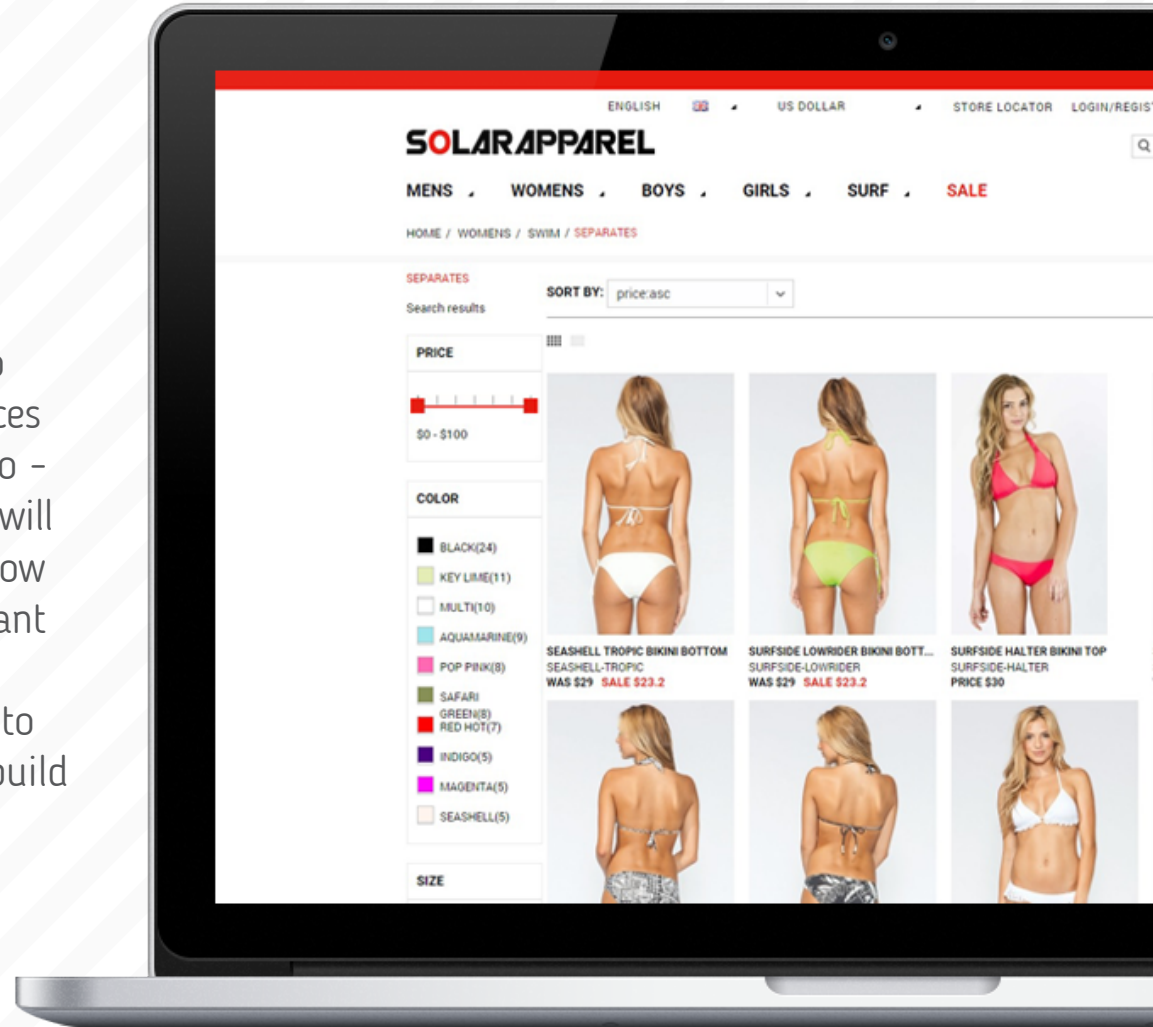

OUR PLATFORM IS TRULY MODULAR.

When you develop your website you choose and pay only for the modules you want to use. We have a store with more than **40 different modules**, to cover all of your needs - you can pick core modules like promotions and vouchers, but also integration with third-party payment providers, address verification or fraud detection service, etc.

SAMPLESTORE

OUR PLATFORM COMES WITH A SAMPLESTORE FOR YOU. SETUP AND READY TO SELL IN LESS THAN 5 MINUTES!

All you have to do start adapting it to your needs - change the products, prices and the look-and-feel and there you go - launch to production in no time! This will not only minimize the risk, but also allow you to only pay for the changes you want to see to the out-of-the-box solution. After all it's always easier and faster to modify an existing solution, than to build one from scratch.

SAAS

Perhaps you don't have millions of dollars for license fees or perhaps it's too much of a risk for you to pay this upfront. Either way you are up for a surprise - we are ready to offer you our platform as software-as-a-service. You can have it, develop your website and pay monthly subscription costs for as long as you use it. This way you can minimize the risk and only pay if you really enjoy the service we offer.
